Public Statement: Licensing of the Business Multidimensional Poverty Index (bMPI)

Effective from 1 January 2026

Wise Responder, Inc. makes this statement so that clients, partners, public bodies and the wider market know who is licensed to use the Business Multidimensional Poverty Index (the "bMPI"), and who is not.

1. **Who holds the bMPI licence.** Wise Responder, Inc. holds the exclusive worldwide licence to the bMPI, under an IP sub-licence from SOPHIA Oxford UK Limited, which holds the head licence from Oxford University Innovation Limited. The licence covers the bMPI's name, its methodology as applied to businesses, survey instruments, indicators, scoring and weighting, software platform and associated know-how (together, the "Licensed IP"). The bMPI applies the Alkire-Foster method developed at the University of Oxford.

2. **Wise Decisio is the only licensed provider in Latin America and the Caribbean.** Since 1 January 2026, Instituto de Tecnologia e Desenvolvimento de Minas Gerais Ltda. ("H&P", CNPJ 73.401.143/0001-89), Belo Horizonte, Brazil, has held from Wise Responder the exclusive licence to deliver the bMPI to clients in the independent countries of Latin America and the Caribbean (the "Territory"), under its joint venture agreement with Wise Responder. H&P delivers the bMPI under the Wise Decisio brand. Wise Decisio is the sole licensed provider of the bMPI in the Territory and the only authorised channel for bMPI measurement, analysis and reporting there.

3. **No use without our permission.** No other company, organisation or individual may use the Licensed IP, calculate or publish a bMPI, or offer bMPI-based services, in the Territory or anywhere else, without the prior written permission of Wise Responder.

4. **No claims of authorisation.** No one may say or imply that they are licensed, authorised, accredited or endorsed to calculate the bMPI; that a measure they produce is a bMPI, is equivalent to the bMPI, or is recognised by the University of Oxford; or that they are a partner or representative of Wise Responder, Wise Decisio or H&P, unless Wise Responder has confirmed that in writing.

5. **Earlier permissions are limited.** Where Wise Responder has given written permission to another organisation in the past, that permission is limited strictly to its written terms. Unless those terms expressly say otherwise, any such permission is non-exclusive and non-transferable; covers only the named country and the specific existing clients and operations it describes; does not extend to a

client's operations, subsidiaries or affiliates in any other country; does not allow the organisation to seek new clients or market bMPI services; and gives no authority to make any of the claims described in paragraph 4. Any authority that came from SOPHIA Oxford USA, Inc. has ended. Wise Responder is now the only party that can grant permission to use the bMPI.

6. **How to check.** If you want to confirm whether a provider is authorised to deliver bMPI services, or whether a measure is a genuine bMPI, contact Wise Responder or Wise Decisio directly. We will respond promptly.

Wise Responder reserves all of its rights, and those of its licensor, in relation to any unauthorised use of the Licensed IP.
